## GermanFEST

Saturday July 27; our club was represented by 8 cars at German Fest on the lake front. The weather was perfect, we had our usual spot on the north end of the summer fest grounds. The many fest goers along with the German Fest people really enjoy looking at, and asking about and riding in our cars as we have already been asked back next year for our 13 year. We also had a pretty good view of the air show. Our day started with a few issues as we lost a phone on the street on our way in. A search party went to look for it but no luck. The phone was found much later on the street unbroken. We had a very rough running car that made to our spot with the help of a few pushers, it was like an all day seminar ended up having to flatbed it home. As of the writing of this article all is repaired just some bad ignition wiring I wish to thank German Fest for their hospitality as we enjoyed the food, entertainment, drink and participate in the parade which to me is the most fun parade we do, as everyone is happy and smiles abound as we drive the parade route with some of us chauffeuring Princesses and Princes (Go to Page 13)
